Training and competency requirements

This application should be read in conjunction with [Categories for Accredited Contractors List for Land Development](#) and [Training and Competency Requirements](#). SA Water will consider a temporary authorisation to permit the contractor to upskill or gain experience in areas outside of current accreditation category. Applications for temporary authorisation are evaluated on a case by case basis, providing a risk based approach is undertaken to mitigate and manage all training, competency, and experience gaps of the contractor.

Works category details

Please complete the following and identify all category requirements requested for temporary authorisation. Respondent must detail the scope of the works, the construction methodology and the mitigation measures put in place for SA Water's evaluation. Mitigation measures must address all training and competency requirement gaps of the accredited contractor.

Works requirement	Temporary authorisation requested for <Tick all that apply>	Experience within previous 3 years <Tick all that apply>
PVC / PE water supply pipelaying < 375mm		
PVC / PE gravity and pressure sewer pipelaying < 300mm		
Pumping station, tanks and other infrastructure – Construction and installation		
DICL pipelaying > 375mm		
DICL pipelaying < 375mm		
MSCL pipelaying > 375mm		
MSCL pipelaying < 375mm		
PE pipelaying – welding / fusion		
Live water link in / main replacement		
Live sewer link in / main replacement		

Qualification / Accreditation Category 1, 2, 3 & 4 / Experience
<Refer to Training and Competency Requirements – Detail the qualification, accreditation area and experience gaps or provide experience evidence>

Scope of work

<Detail the location of work, customer impacts, pipe material, size, length, thrust blocks, excavation, valves, fittings, dog legs, embedment & backfill. Include details of quality assurance systems, inspections, testing, disinfection & commissioning requirements>

Construction methodology

<Detail the construction methodology for scope of work>

Risk mitigation measures

<Detail all risks associated with scope of works and describe mitigation measures. Address contractor gaps in training, qualification and experience. How will the contractor's accreditation gaps be managed? Explain how the superintendent will provide technical direction, implement and manage a risk mitigation plan?>

Accredited Contractor Temporary Authorisation Application

Contractor supporting information
<i><Example – list of drawings, ITP's, previous experience & provide supporting documents></i>
Conditions of temporary authorisation
<p>This temporary authorisation is subject to the following conditions and expectations:</p> <ol style="list-style-type: none"> I. The temporary authorisation applies only to the nominated accredited contractor for land development (contractor) and applies only for the duration of, and specific to, the build requirements for the nominated project, development and stage. II. The successful temporary authorisation and all specified conditions will be formally included in the DAFI and form part of the agreement between SA Water and the developer. III. The developer, superintendent and contractor will ensure compliance with the submitted documentation and conditions of the temporary authorisation for the duration of the project.

SA Water use only
